"Ultimately operators have been demanding a next generation aeroplane that can deliver not only profits but reliability, efficiency and off course passenger comfort. The Tecnam design team have answered all these needs in developing the P2012 Traveller, one of the first new FAR23/CS23 aeroplanes in 25 years! The P2012 Traveller builds on our commitment to continue to develop outstanding, stylish, innovative and affordable aeroplanes. For the Tecnam team, designing and building aeroplanes isn't just a job, it's an extension of our passion for flying."

Paolo Pascale, Tecnam Managing Director

Tecnam 'Quality aircraft since 1948'

The Tecnam P2012 Traveller continues to build on Tecnam experience of over 60 years for designing and manufacturing innovative, stylish, efficient and affordable aeroplanes.

Tecnam traces its roots back to the aspirations of the Italian brothers Luigi and Giovanni Pascale, who developed and produced the first of their innovative and stylish aeroplanes in 1948, building their reputation and worldwide recognition under Partenavia brand. Established in March 1986, Costruzioni Aeronautiche Tecnam now delivers over 250 aeroplanes per year from its two Italian production facilities located at Naples Capodichino Airport and at "Oreste Salmone" Airport, Capua.
